Mr. Smith:

It has come to my attention that Region 4 personnel are contacting my clients directly about testing in their homes. Please be mindful of DR 4.02 when addressing specific people about their specific homes; they are represented by counsel. We appreciate the community efforts at communicating information about program, activities, the NPL, public comments, etc., but at this granular level we feel that our clients may be prejudiced by any ex parte communication about their very specific property or health.

Again, I mean no innuendo here, rather I am simply mindful of the attached which we previously discussed when RCRA was running the show, then the following "fact" sheet that appeared to have been co-opted by Mr. Palmer, Ms. Fisher and their clients. As you hopefully understand, the timeline of the attached and the "fact" sheets have caused us concern.

As you know, in the past we have helped facilitate testing, not stood in the way of it. I am puzzled why Region 4 has a new tactic or why it would have a tactic at all.

Nevertheless, please provide us (your contact on this is Ted Lyon) with information regarding testing including: who will do the testing; what compounds will be tested for; when the testing will be performed; when the results will be delivered to EPA, us, anyone else; whether the responsible parties (including Meritor or Grenada Manufacturing) will have **any** role in the testing including (design of the protocol, receipt of the results, consultation with Region 4 or any of those involved in the testing); why the testing is now occurring; whether the testing will need repeating; the specific protocol for the testing and the basis of the protocol.

Mr. Lyon, your contact on this matter, is cc'd here and the office number is 972-279-6571.

Thank you for your attention to this matter. Please pass this along to the relevant personnel from Region 4 that may now be involved.
